# 2023 GREEN BOX ARTS FESTIVAL

*Celebrating 15 Years  
of Green Box*

Friday, June 30 – Saturday, July 15

GREEN MOUNTAIN FALLS, COLORADO

# from the executive director

In 2009, Christian Keesee and Larry Keigwin developed a visionary idea: to create a first-class arts festival, which would present the best in contemporary visual and performing arts and engage the special community in the tiny mountain hamlet of beautiful Green Mountain Falls.

And now, in 2023, we couldn't be more excited to celebrate and share with you our 15th Annual Green Box Arts Festival. Inside these pages you will find more than 80 performances, classes and other events over the two and a half weeks of the festival.

So, get out a pen, mark your favorite events, and make plans to be part of our community. While this brochure offers a comprehensive look at all of our festival programming, for the most up-to-date information and tickets/registration, visit [www.greenboxarts.org](http://www.greenboxarts.org)

On behalf of all of us at Green Box, we look forward to having you join us in the mountains this summer to retreat in the tranquility of beautiful Green Mountain Falls, while feeding your soul with exquisite artistic experiences. We know you will leave feeling refreshed, re-energized and curious for more. Won't you join us?

Sincerely,

**Scott RC Levy**, EXECUTIVE DIRECTOR

Green Box is renowned for public art installations, many of which are on-view year-round. For the past 15 years, Green Box has featured numerous works, all of which have been immersed in the natural landscape of Green Mountain Falls.

As a 2023 Green Box Artist-in-Residence, Nikki Pike will create and install a new bark-skinned installation on view through the summer.

Join us beginning at 10 a.m. Opening Day on Friday, June 30 for the unveiling of new works by Brenda Biondo, Nikki Pike, Molly Rideout, brooke smiley, and Brian Wall.

## A New Work, by Nikki Pike

H. B. WALLACE RESERVE

Artist and activist Nikki Pike promotes togetherness as a Cultural Agent working

with local communities to promote activity and creativity. Her work is engaged in positive yet critical engagement with society and recognizes the need for belonging, connectedness and the environment. Pike's environmental works combine eye catching bark texture with pure forms, playfully inviting the viewer to consider the impact of human manipulation of the environment.

Art unveilings: Join us beginning at 10 a.m. Opening Day as Green Box unveils FIVE NEW installations!

### Skye, by Brian Wall

Brian Wall is a British-born American sculptor living in California. His career stretches over seven decades from the modernist art center of St. Ives, Cornwall, in the '50s, to the London art scene in the '60s, to Berkeley, California, at the height of the counterculture revolution of the '70s. Wall was Head of Sculpture at London's Central School of Art and Design, a professor at the University of California, has had numerous solo shows, and his sculptures reside in many private and public collections. Wall's one-of-a-kind constructed and welded steel sculptures combine geometric elements, often created from sliced sections of industrial steel tubes or I-beams and range from tabletop scale to monumental outdoor installations.

### Open Skies, by Brenda Biondo LAKE STREET DISPLAY

Brenda Biondo is an American artist who uses traditional camera techniques and a formalist aesthetic to explore the perception of atmospheric light and color and their role in the construct of landscape. Her work emphasizes the use of unconventional contexts to create new ways of looking at common subjects, while challenging viewers' perception of color and three-dimensional space.

A native New Yorker, Biondo currently divides her time between Manitou Springs, CO and Marfa, Texas. Biondo's work has been exhibited throughout the country and published in numerous print and online publications, including The Wall Street Journal and The Washington Post. Her photographs are held in numerous private and public collections, including those of the Library of Congress, the Museum of Photographic Arts, the Denver Art Museum, the Center for Creative Photography and the San Diego Museum of Art.

### The Managers, by Molly Rideout LAKEVIEW TERRACE

Molly Rideout is a Midwestern writer and bookmaker whose work focuses on place, history, and belonging. Her current book-length project explores forgotten stories of rural America and their reverberations on contemporary life. *The Managers* tells the stories of the women who ran the historic building originally built in 1890 as a boarding house. Of her work as a Green Box Artist-in-Residence, Rideout says "Gaps always exist in historic records, especially in the documentation of rural areas and the lives of women. Everything in this essay is true, as best as I understand it today. Tomorrow will always be another story."

A portion of *The Managers*, by 2022 Artist in Residence Molly Rideout from outside the work at Lakeview Terrace.

### EARTH.SPEAKS, by brooke smiley ANDERSON CONNECTOR TRAIL, ACROSS FROM SALLIE BUSH COMMUNITY BUILDING

ἄλλα ἄλλα Osage woman and artist brooke smiley guides land and body learning through somatic education, public earth art, and dance performance. Her work engages a deepening awareness in the body, our relationships with one another, and the world.

The Green Box *EARTH.SPEAKS* work is part of her series of land-based public art projects aimed at healing through community creation of earth markers, which is a sustainable practice of structure building. Created with, for, and by the community of Green Mountain Falls, *EARTH.SPEAKS* centers on Indigenous identity through reconnecting with our bodies, one another, and the land.

### Green Mountain Falls Skyspace, by James Turrell

*Green Mountain Falls Skyspace* by American artist James Turrell offers an open eye to the skyline and stars. The adventure begins with an inspirational journey from the center of town up Red Butte, arriving at a one-of-a-kind kinetic light and color experience that shifts perception of nature and sky through contemporary light and space – an experiential work of art unlike anywhere else in the world.
